Creating or updating club affiliation on the Snowsport England membership system.

For SE, once signed in to the membership system (Sport80) you should be able to access the membership page like this, which shows the 'Organisations' you belong to, which can be anything from zero upward. In this example we can see four organisations listed.

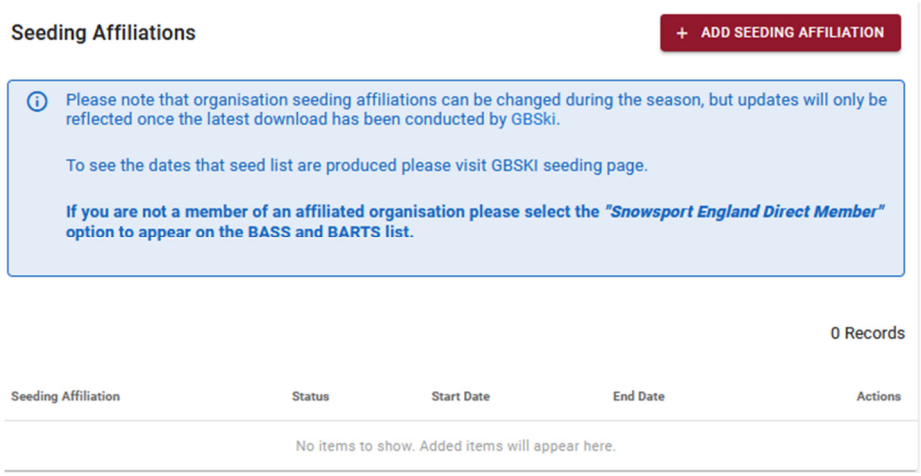

The important thing to realise is that – as the last paragraph of the large blue notice says – there are additional steps that must be carried out to populate the club details used for BASS and BARTS seed lists, and to populate race data for start lists and results. Simply listing the club, or setting a club as the 'primary' club in the above membership screen is not enough.

Clicking on the 'Seeding Affiliations' link on the left-hand side takes us to the next screen which lists the club(s) to be used for BASS and BARTS racing. In our example we can see that for artificial slope racing they have selected Hemel, even though that is only the fourth organisation in the list on the previous page:

If someone has no club information appearing on the seed lists, then this screen would be empty like this:

The solution there is to click the red button to 'Add Seeding Affiliation', where you can then choose which affiliation to add, and then the organisation (club) you want to set.

If you want to change clubs, you can edit existing affiliation(s) to alter the clubs listed for either BASS or BARTS seed lists, but you should note that this change will only affect the next seed list to be published on GBSKI, it will not alter the current seed list. Membership information including club affiliation is only updated prior to publication of each seed list, and occasionally between lists if we are made aware of many new joiners or changes.
