English Alpine Championships
Training Lane Information

Training lanes in Bormio can only be arranged directly with the lift company (SIB / Bormio Ski). The EAC organisers have no access to or control over the allocation of training lanes.

Please use the links below to access the information and the online booking system. Please note that the latter only appears to be available in Italian so you may need to use a translator on your web browser to check the details, although they appear to be the same as are shown on the downloadable info PDF.
